

# DUPLA

**DUPLA** is a negative pressure full face mask with threaded connector to EN148-1. DUPLA integrates a panoramic visor and can be used both with screw filters to EN 148-1 and special cartridges of the Spasciani 2000 series.

The face blank is normally made of TPE but it is also available in EPDM or SILICONE equipped with scratch and solvent resistant polycarbonate.

The **DUPLA adapter** made of nylon (p/n 15790000) allows the connection of two cartridges SPASCIANI series 2000 to the TR2002 mask.
